

# Water-use Efficiency – Irrigation Lagoon

**This is an old version of the page**

**Date published: 10 October, 2019**

**Date superseded: 7 December, 2021**

For recent changes to this guidance, please see the [bottom of the page](#).

## Aim

The aim of this item is to improve water-use efficiency by collecting and storing water in an irrigation lagoon. This will also help to protect water quality at times of low water availability due to low river flows.

## Eligibility

The land must be within a catchment which drains to water bodies that are significantly impacted because of abstraction for agriculture.

## Spatial targeting

[Map of target area – Water-use Efficiency – Irrigation Lagoon \(PDF, Size: 653.3 kB\)](#)

doc\_external\_url: [https://www.ruralpaymentsandservices.org/media/resources/48\\_Water\\_use\\_efficiency\\_irrigation\\_lagoon.pdf](https://www.ruralpaymentsandservices.org/media/resources/48_Water_use_efficiency_irrigation_lagoon.pdf) This item is available within the target area shown on this map.

You can check if this item is available on your holding [here](#).

## Application requirements

You must produce a diffuse pollution stading assessment.

## Requirement

- if an abstraction from the water environment is required to fill the lagoon then an authorisation will be required from the Scottish Environment Protection Agency
- the lagoon must be off-line (i.e. there should be no impounding works which hold back flows in wetlands, rivers, lochs and estuaries)
- you must obtain planning permission, or have confirmation that planning permission is not required for your proposed lagoon
- where a proprietary lining is used, a receipt for the liner will be required

## Payment

### Irrigation lagoon

The maximum payment for this option is restricted to £30,000 per business:

- £2.24 per cubic metre without a proprietary liner
- £6.25 per cubic metre with a proprietary liner

Collection of run-off from farm stading roofs:

- underground drainage – £35.46 linear metre

## Inspections

The inspectors will check:

- the location and extent of any irrigation lagoon

- that you have a receipt for a proprietary liner
- the length in metres of drainage to the lagoon
- the lagoon is offline and there are no impounding works which hold back flows in wetlands, rivers, lochs and estuaries
